

ENSURE FOOD SAFETY CONTINUITY DURING THIS CHALLENGING TIME
Lab Services, Testing, Audits and Certification Support from SGS North America

SGS North America (Fairfield & Rutherford, New Jersey) The SGS North America - Food Services and Certification and Business Enhancement teams would like to offer support to NJFPA members who process and handle food.

We're thinking of all our friends and associates in the industry who conduct routine microbiological testing either in house or through using external labs. You may need some extra capacity and support for the next few months as our communities adjust and work through the COVID19 situation. As you pivot with a changing customer base; you may also require label creation, label review, nutritional analyses, Proposition 65 among other items on your compliance checklist. You may also be looking at meeting deadlines for company certifications and safety audits coming up on your calendars.

Each of you have a unique case and a special role in the food industry. We look forward to hearing from you to see if we can assist with your individual needs at this time.

Please reach out to:

Deborah Cohen for food lab tests deborah.cohen@sgs.com tel. 201-213-7723.

Lina Bush for audits and certifications lina.bush@sgs.com tel. 240-778-3510
